

## Call for Workshop Proposals

Following the success from previous editions, FPT 2018 will host several workshops on December 10th & 11th, 2018. We are soliciting proposals for new and recurring workshops to be organized with FPT 2018, as they provide excellent opportunities to bring together researchers and practitioners from different communities to share their experiences in an interactive atmosphere, and to foster collaboration for new and innovative projects. We invite you to submit workshop proposals on any topic related to the broad set of Architectures and Technology, Applications and Benchmarks, Design Methods and Tools, Self-aware and Adaptive Systems, and Trends and Education before the deadline of March 1st, 2018.

We strongly encourage workshops that focus on innovative and original ideas related to the core topics of FPT. Organizers can choose between invited presentations (to be listed at the time of submission), open call for papers, or a combination of both. Any other forms of interaction with the audience - panels, demo's, posters - are of course welcome, as we see workshops providing as many and dynamic forms of engaging the audience as possible.

For workshops that do include an open call for papers, we point out that the organizers are in charge of setting up the submission, review, and camera-ready management processes. The organizers must also indicate what their expectation for the workshop is (papers submitted, papers accepted).

Workshop organizers are free to arrange the publication of their workshop papers independently. FPT 2018 does not provide workshop proceedings, but may consider including the workshop papers on the conference website, as long as the workshop organizers can provide their final papers in time.

### Workshop proposal submission requirements

To submit a workshop proposal, please prepare a PDF file (2 pages max, excluding biographies and references), including the following information:

- A title for the workshop.
- A description of the topics and specific issues that the workshop will address, how the workshop complements FPT 2018, and why the workshop theme is relevant.
- Expected format of the workshop (regular paper presentations, poster presentations, invited

talks, panel discussions, demo sessions, or other ideas to promote active exchange of ideas).

- List of organizers including their short biographies, affiliation, and their expertise in the proposed topic(s).

- (preliminary) Program committee, if applicable.

- In case the workshop has been previously held, provide information to show that the previous edition(s) were successful in terms of paper submissions and attendance.

- Length of the workshop (half-day/full-day) and the expected number of participants.

- Follow-up plans (if any) to disseminate the ideas from the workshop, for example through position paper or journal special-issues.

Please, send your proposals by email ([fpt18-ws@lut.eee.u-ryukyu.ac.jp](mailto:fpt18-ws@lut.eee.u-ryukyu.ac.jp)) to the FPT 2018 Workshop Chair.

FPT2018 Workshop Chair:

Hiroki Nakahara, Tokyo Institute of Technology, Japan
